**Web App Intern**                                                      May 2023 - Aug 2023
IT Panda                                                                  *Karachi*

- Worked on mostly frontend using React JS, Redux, Tailwind CSS.
- Making Responsive websites tend to rank higher in search engine results for providing a better user experience.

## PROJECTS

**Ecommerce website .** Designed and built a dynamic e-commerce platform using the MERN stack, featuring a responsive UI, secure payments, and user-friendly functionalities. Collaborated with a team to implement a seamless online shopping experience and admin dashboard. [(Visit Now)]

**Blog App.** used React.js to create a dynamic blog application that demonstrated proficiency with state management, responsive design, and component-based architecture. Performance was enhanced for a pleasant user experience, secure user authentication was put in place, and RESTful APIs were integrated for seamless data transfer. [(Visit Now)]

**Attendance App.** one designated for administrators and another for students. Students have the ability to edit their profiles and indicate their attendance. A list of students is available for simple control on the administrative side, allowing for the creation of new student profiles and the modification of current student data.[(Visit Now)]

**Fitness App.** It's made with ReactJS and Rapid API, featuring an easy-to-use interface. Get personalized tips and advice to stay healthy and fit. [(Visit Now)]

## EXTRA-CURRICULAR ACTIVITIES

- Actively write Supported The Citizens Foundation (TCF) in Pakistan, a non-profit for underprivileged education. Organized 10+ fundraising events in pakistan, raising awareness and garnering support.
- Volunteered at Dawood University's Computer Engineering Society, organizing workshops, seminars, and tech talks to connect students and industry professionals.
